klaxoon

The all-in-one visual collaborative platform for engagement & productivity for trainers
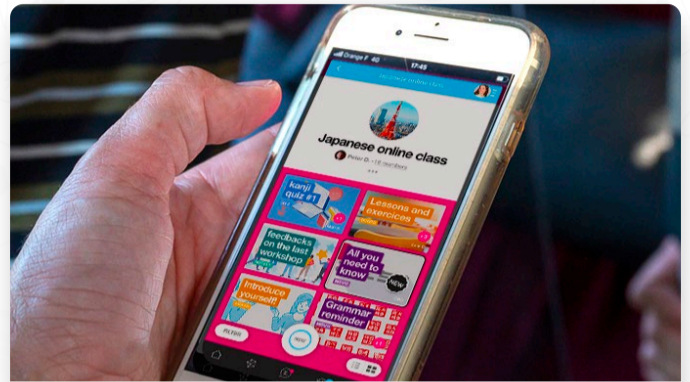

At Klaxoon we believe engagement is key to deliver sticky learning experiences.

We developed 10 visual collaboration tools to help you prepare, create and facilitate impactful training sessions whether on-site, remotely, or in hybrid mode.
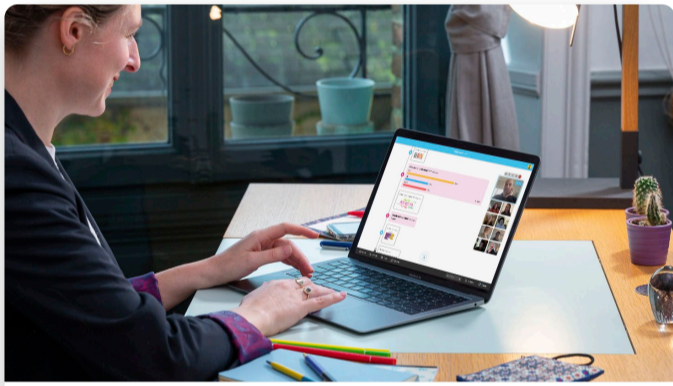

Spend more time training than preparing

Klaxoon offers a wide range of ready-to-use activities to design content in just a few minutes to make your sessions unique. Import your slides, create word clouds and quizzes, and impulse dynamic group conversations in the same workspace.
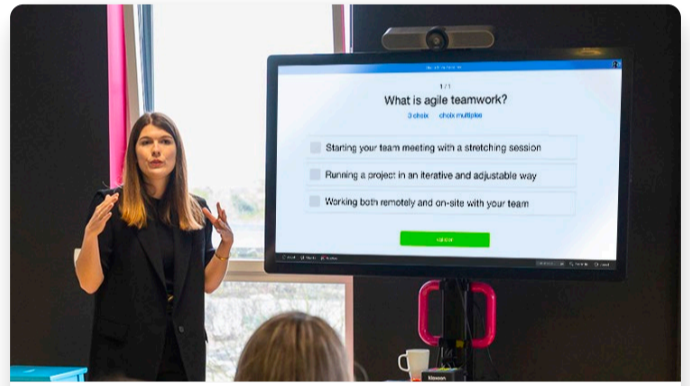

Share information easily with learners

Create a private and secure Network for each group with Klaxoon, and import all the learning material to share with them - available any time anywhere they need it. The best thing about it? You can grant access before or after the courses, so they can read your material asynchronously, check a fact, add an idea or ask questions. You instantly get notified, and can answer whenever it best suits you.
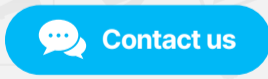

Run engaging training courses

With Session turn your lectures into an engaging and sticky learning experience. Boost participation during your training course with gamified quizzes, challenge your audience with a wide variety of questions and have them interact live with comments. Export your material along with the results from your activities in PDF in one single click. Evaluate and analyze the rate of engagement at each step of the course.

Assess knowledge and collect feedback efficiently

Thanks to Quiz and Challenge, you can be sure assessing your training participants will be interactive! Choose competitivity, reflection, single or multiple-choice, among many possibilities. Make it easy for them to unleash their creativity and express how they feel after the training, for example with a voting Question or a word cloud in Klaxoon. And this way, secure the next steps of your training!

💬 Contact us

For online or on-site trainings, Klaxoon is a great tool to communicate with participants, dynamize our content and present it in a different way.

Yulia Leborgne
Learning Designer
Sup de Pub

I have enjoyed preparing my training sessions and thinking about new and varied interactions as much as I have enjoyed delivering them.

Dominique Rondot
CEO & Professional Trainer
